

Preparing for your Airbrush Tan

- Shower and exfoliate the surface skin. If possible, apply nail polish (clear or color) to prevent the possibility of the nails becoming discolored by the solution.
- Do not apply lotion, creams, perfume, deodorant, or make-up products to the skin prior to your application.
- Remove any jewelry that could block the tanning solution from penetrating the skin or which will cause the tan to be uneven.
- Shave before- NOT after your tan.
- Wear undergarments that will give you the tan lines you desire (you can opt for no tan lines, as this is done privately and professionally), keeping away from items that are not machine washable.
- Wear dark, loose-fitting clothes which also may need to be washed after your session.
- Long hair should be tied up away from the face and neck. A shower cap is also a good idea (solution will not stain hair).
- Plan to bathe, swim or otherwise get wet for 8 to 12 hours after your session.
- After the 8 to 12 hours when you bathe next, you will notice some color washing off. This is the color guard and NOT the actual tan. Moisturize daily to maximize the longevity and look of your fabulous new Sunless Airbrush Tan.
